

DISCOUNT RAMPS.COM TRI-FOLD X-TRA LONG ATV LOAD- ING RAMP

THE PRODUCT: Discount Ramps has an aluminum ramp or rack to accommodate just about any vehicle or cargo. Their X-Tra Long Tri-Fold ATV ramp is a high-quality loading solution at a great price. It is built to an extra-long 85 inches in order to accommodate the tall bed heights of lifted trucks or trailers, while still folding small enough to fit in the bed of your truck.

MATERIAL: Their ATV ramps are constructed out of high grade aluminum, with rubber ends to grip your truck's tailgate.

CONSTRUCTION: These ramps are of good quality, and they withstand a lot of abuse. The aluminum is light weight, coming in at 32 pounds, and the welds are strong, with quality hinges and a nice silver finish. The ramps offers a 1200 pound loading capacity.

PERFORMANCE: We tested the ramp with a Ford F-350 equipped with a ten-inch lift, and the ramp stood up to continuous loading of heavy bikes, even with the steep loading angle. It is a very good idea to use the supplied tie downs to secure the ramp to the truck while loading, otherwise hurried loading may dis-

lodge the ramp from your truck and send you and your quad tumbling.

CONSIDER THIS: Discount Ramps has a loading solution for just about any wheeled vehicle, and they also manufacture ATV and motorcycle lifts and jacks, racks, and even pet ramps, all at an unbeatable price.

THE VERDICT: Discount Ramps makes great products, and the X-tra long tri-fold ramp is no exception. With a price this low and a ramp this nice, it makes you wonder how they stay in business!

RATING ★★★★★
